Exam : GES-C02

Title : Snowflake Certified
SnowPro Specialty - Gen AI

Version : DEMO

1. In Cortex, which function allows AI models to perform structured output extraction from unstructured text?

- A. EMBED
- B. SUMMARIZE
- C. CLASSIFY
- D. COMPLETE with structured JSON output

Answer: D

2. Which Cortex functions are typically leveraged to build multi-turn conversational agents? (Choose three)

- A. EMBED
- B. COMPLETE
- C. SUMMARIZE
- D. CLASSIFY

Answer: A, B, C

3. Which step is required before Document AI can analyze a document?

- A. Transform the document into JSON logs
- B. Register the document with Document AI and prepare it
- C. Store document embeddings manually
- D. Apply Row Access Policies

Answer: B

4. Which factor most directly impacts cost when scaling Cortex-based workloads?

- A. Inference volume and token usage
- B. Network bandwidth used for replication
- C. Fail-safe retention window
- D. Result cache size

Answer: A

5. Which Snowflake features can directly support building enterprise-grade chatbots? (Choose two)

- A. Cortex Complete
- B. Snowpipe Streaming
- C. Secure Data Sharing
- D. Snowpark APIs

Answer: A, D
